SUMMARY

UI/UX Designer and Frontend Developer focused on creating intuitive, user-centered digital experiences across web and mobile. Hands-on experience in interface design, wireframing, prototyping, design systems, and frontend implementation, with practical product experience through internships and independent projects.

Work Experience

UI/UX Design Intern

Memolane (Neo Labs) | Apr 2026 – Jul 2026

- Designed and refined UI for a journaling-based product
- Created wireframes, layouts, and components in Figma
- Collaborated on design decisions and product experience

Education

B.Tech – Computer Science (AI & ML) 2023 – Present
Lamrin Tech Skills University, Punjab

Intermediate (Science) 2023
Patna Convent, Patna

Matriculation 2021
St. Karen's Secondary School, Patna

Skills

UI/UX Design

Figma, Wire-framing, Prototyping, Design Systems, Visual Hierarchy

Frontend Development

HTML, CSS, JavaScript, DOM Manipulation, REST APIs, Responsive Design

Core

Problem Solving, Design Thinking, Communication
Team Collaboration

AI/ML & Robotics

Machine Learning Fundamentals, Data Handling, ROS2, PID Control, Gazebo Simulation

Tools

Figma, Framer, GitHub
Netlify, VS Code
Canva

Projects

AI-Powered Amazon SaaS — UI/UX

Designed a SaaS interface with structured dashboards, workflows, and a consistent visual system.

Personal Portfolio — UI/UX & Frontend

Designed and developed an interactive portfolio showcasing projects, experience, and skills.

30 Days JavaScript Project Collection — Frontend

Building 30+ interactive JavaScript projects focused on DOM manipulation, APIs, and reusable UI components.

Student Course Enrollment — UI/UX

Designed course discovery, enrollment flows, and dashboard interfaces focused on usability.

Employee Leave Management — UI/UX

Designed employee leave workflows and dashboard interfaces for streamlined leave management.

Rajratan Business Website — UI/UX

Designed a modern business website with clear visual hierarchy, structured content, and intuitive navigation.

Dynamic Price Analyzer — AI/ML | Team Lead

Led an ML-based project for analyzing product pricing patterns and trends.

Drone Stabilization — Robotics

Implemented PID-based drone control and simulation using ROS2 and Gazebo.

Achievements

- Participated in e-Yantra Robotics Competition — IIT Bombay
